

Dear FCC:

Subsequent to filing our petition on September 10, 2001, Mr. Riley Hollingsworth issued 3 FCC enforcement letters on September 12. Three amateur stations were consistently violating ARRL's Voluntary 160M Bandplan adopted in July by using SSB on 1823 kHz (below the Bandplan limit of 1843). I feel this underscores the need for a change in FCC law which is not dependent upon voluntary compliance. In addition to benefits already stated in our petition, I believe adoption of RM-10352 will reduce the future workload for the FCC's enforcement branch.

Sincerely,

William R. Tippet W4ZV
